Instructions For Use

A Fitting & Removing The Plates

To fit the plates:

- Place the appliance in the open position with the controls directly in front of you.
- Each plate is embossed with 'Low' or 'Up'. Select the 'Low' plate, hold it flat with the positioning guides facing away from you and the 'Low' embossed sign facing up.
- Align the two positioning guides to the back of the plate with the brackets on the bottom of the appliance housing base. Tilt the back of the plate and slide it underneath the brackets. Push down the front end of the plate until it locks into place.
- Select the 'Up' plate and with the 'Up' embossed sign facing up and the two positioning guides facing away and down. Align the plate with the brackets on the underside of the lid of the product and push down the front to the locked position.

To remove the plates:

- Locate the plate release buttons on the right side of the unit's upper and lower housing.
- Press the Upper release button firmly and the "Up" plate will pop forward slightly from the lid. Lift the plate up and slide out from under the brackets in the centre.

- Press the button on the Lower housing and repeat the above method to remove the "Low" plate.

N.B: Always allow the appliance to cool for at least 30 minutes before removing the plates.

B Using The Sandwich Maker

- Plug the appliance into a suitable mains socket.
- Although the plates have a non-stick coating, we recommend that you season the sandwich plates with cooking spray or oil. If using oil, apply with a paper towel or pastry brush.
- Turn the temperature control dial to the desired setting for cooking; Low, Medium or High.

- When the dial is in place a red light will illuminate on top of the appliance to indicate that the power is on.
- Once the appliance has reached the optimal temperature, the green light will illuminate to indicate the appliance is ready to cook.
- Place the ingredients on the bottom plate. Close the lid and lock the handle.
- It may take a few seconds for the green light to switch off. This is normal.
- The green light runs on a thermostat and indicates when the product is up to temperature. As part of the cooking cycle the light will go on and off during this process. You will need to assess if the food is cooked by lifting the lid.
- When you are happy the food is cooked, remove it by gently loosening the edges with a heat-proof plastic spatula. Never use metal utensils, as they may damage the non-stick coating.

N.B. The first time you use the appliance, it may have a slight odour and may smoke a little. This is normal and common to appliances with a non-stick surface.

Hints & Tips

Using the Sandwich Maker

- The Sandwich Maker has been designed with a handle that locks down to secure the contents when cooking.
- Always preheat your Cuisinart Sandwich Maker completely before using.
- The lid of the sandwich maker should be closed whilst preheating.
- The sandwich plates measure 14cm x 13.5cm and are designed to accommodate breads of all shapes and sizes.
- Breads longer than 14cm can easily be toasted lengthwise or diagonal. Breads can also be sliced from whole loaves.
- Butter, and olive oil are recommended for coating the outside of bread when making sandwiches.
- "Light/Low Fat" versions of margarines are not recommended as they do not withstand heat (check manufacturer's labels for cooking recommendations for best results).
- Butter at room temperature is more suitable when spreading on bread, or melt and apply with a pastry brush. For best results, moist ingredients such as sliced tomatoes or fruits, pickles, etc., should be blotted or patted dry with a paper towel.

- The housing base, cover and control knobs can be wiped clean with a soft, dry cloth. For tough stains dampen cloth. Never use an abrasive cleaner or harsh pad.
- Never leave plastic utensils in contact with the appliance.
- Make sure all the parts are clean and dry before storing.
